*Give us a call. We stock manuals for over 1500 different tractors that are not listed in this catalog.*

**Parts Manual** - Exploded views of all parts on the tractor. With numbered pictures giving you great detail on assembly and disassembly. It also gives you a guide, with numbers, for ordering parts, and makes you seem much more informed when talking to the dealer. Many service manuals, after telling you how to disassemble, in detail, and how to repair, will simply say "reassemble". If you have your PTO in the wash tank, in 30 pieces, without notes, you have a problem. The parts manual can help you out with an exploded view of the PTO unit, and you can see immediately how it all goes back together.

**Operator's Manual** - Sometimes referred to as the owner's manual. This manual came with the tractor. The manual that was given to the ultimate consumer by the manufacturer. It can be compared to the manual you receive in the glove box of a new car. This manual gives the owner-operator instructions, shift patterns, capacities (anti freeze, crankcase, etc.) and adjustment procedures (brakes, clutch, etc.). This is a very useful and valuable tool in operating your tractor.

**Service Manual** - Tells you how to take the tractor apart, how to fix it, and how to put it back together again. It is the manual that the factory furnished the dealer's shop service department, and was not sent or given to individual retail customers. These are authentic manuals that deal with repairs in the language of a mechanic. Often times they include much valuable information as to specifications, torque's, etc. If you are in the serious repairs or restoration, you need the shop service manual; It can give you many short cuts and save you much time.

# HYDRAULIC PUMPS

## HYDRAULIC PUMPS, NEW & REMANUFACTURED

When replacing your hydraulic pump it is imperative that you change the hydraulic oil & filters on your tractor. Failure to do so may cause contamination resulting in a damaged or non-operating pump. Warranty will be void if the filters & oil are not replaced at time of pump installation. Refunds or replacements for hydraulic pump warranty will be subject to pump inspection.

Serialized pumps have a metal tag that contains the serial number of the pump. Non-serialized pumps do not have this tag.

## DECALS: MYLAR VS. VINYL

Vinyl decals are individually cut and do not have "clear" space between the letters or numbers. Mylar decals go on as a "sheet" and have clear material between the letters or numbers. Mylar decals are similar to the decals that would have been originally applied, but vinyl decals look better.
